- · Kool-Aid
- · Jell-O
- Do not drink alcohol

## PREP - Procedure 9am or later

## 7pm - Start 1st Dose:

- 1. Use the mixing container to mix the contents of Dose 1 pouch with at least 16 ounces of water by shaking or using a spoon until it's completely dissolved. This may take up to 2-3 minutes. Take your time slowly finish the dose within 30 minutes.
- 2. Refill the container with at least 16 ounces of clear liquid. Again, take your time and slowly finish all of it within 60 minutes.
- · Drink plenty of clear liquids during and after bowel-prep process to help prevent dehydration

# On the Morning/Day of your PROCEDURE

#### 6am – start 2nd Dose:

- · Follow steps 1-2 above.
- · Be sure to finish drinking all of your laxative by 7am.
- If you take daily medication(s), you may do so up until 2 hours before your scheduled report time with small sips of water.
- If you take blood thinners, follow the instructions your health care provider gives you.
- Arrange for a ride home. You will be drowsy after the exam and will need an escort, 18 years or older. If taking a medical cab service, you will need an escort as well to take you home.

## The importance of a GOOD PREP

Your prep is one of the most important parts of your colonoscopy. Without a good prep, your bowel empty and clean, your gastroenterologist will not be able to see your colon clearly. This could lead to missing a polyp/lesions or rescheduling your colonoscopy.
